ALCOHOL, DRUGS AND DRIVING

A Supplement to 'The Drinking Driver'*

The Association's report 'The Drinking Driver' (1965) led to important amendments in the law, as a result of which certain changes are necessary in the sections of the report which dealt with legal and medical procedures. This Supplement revises those sections of the report concerned with procedure and takes into account at the same time the procedure for dealing with drivers suspected of being impaired by drugs other than alcohol.

Price 30p

***Copies of 'The Drinking Driver' are still available at Price 12½p**

Both publications can be ordered together at the combined price of 40p
(All prices include the cost of postage)

Payment must be enclosed with order or a surcharge of 20p will be made for rendering invoices and statements.

BMJ publications

Cardiovascular Diseases in the Tropics (1974)

The book presents the present state of knowledge regarding many conditions previously thought to be peculiar to the temperate and developed countries and also deals with those disorders peculiar to the tropical situation. It provides an up-to-date review suitable both for clinical and epidemiological work and for further research into these disorders.

Price £4.50 (U.S.A. $13.50)

A New Look at Infectious Diseases (1974)

Infectious diseases remain as much a medical challenge as ever, and the articles collected in book form under the title *A New Look at Infectious Diseases* covers many aspects of diagnosis and treatment. The widespread use of immunization, with its occasional hazards, the use of newer antibiotics, and increased risk of spread by travel are all dealt with, as well as the problems of diagnosis produced by present day doctors' unfamiliarity with many diseases which were formerly so common and widespread.

Price £2.00 (U.S.A. $6.00)

Medicine in Old Age (1974)

The series of twenty two articles published in the *British Medical Journal* throughout the winter have been collected in book form as a convenient source of reference for general practitioners. The emphasis is on remedial mechanisms, and the use that can be made of psychogeriatric and social services in keeping the elderly healthy and relatively independent members of the community.

Price £2.00 (U.S.A. $6.00)

Today's Drugs/3 (1973)

The third and final volume of the 'Today's Drugs' series, like its predecessors, is based on *BMJ* articles revised and brought up to date by their authors. It deals with respiratory agents, drugs acting on the central nervous system, and a miscellaneous group of drugs.

Price £1.25 (U.S.A. $3.75)
